

SIFAX
GROUP

The background image shows a busy port terminal. On the left, a large blue container ship is docked with several stacks of colorful containers (yellow, red, blue) featuring the 'MSC' logo. A large yellow and black Liebherr 420 container crane is positioned on the pier, with its boom extending over the ship. In the foreground, a yellow and black Liebherr container handler is visible. In the background, a body of water is visible with other cranes and port infrastructure. On the right side, there is a large orange graphic element containing the text 'CORPORATE PROFILE' and a list of company entities. Below the text, there is a semi-transparent image of three white trucks parked in a row.

CORPORATE PROFILE

- SIFAX Logistics Limited
- SIFAX Container Port & Terminal

SIFAX Group

Port & Cargo Handling Services

Ports & Cargo Handling Services is the port operations arm of SIFAX Group. It was among the few terminal operators given concession in 2006 to run port terminals in Nigeria in the light of the Federal Government's decision to build capacity in the maritime industry through public - private sector partnership.

The company manages the Terminal C at the Tin Can Island Port, Apapa, Lagos. The terminal has FOUR berths with a combined length of 795 meters and 13 meters draft and conveniently handles bulk/general cargo carriers, as well as container and RORO vessels.

Ports & Cargo Handling Services Limited has completely changed the face of port terminal management in Nigeria with its multi-million dollars investment in functional and modern cargo handling equipment including shore cranes, RTGs, terminal tractors, among others. There has also been a massive investment in the provision of other infrastructure at the terminal as well.

With other innovations like computerized container tracking and ship planning, the company offers the port users excellent service that has turned the terminal to a port of first choice in Nigeria for vessel owners, ship agents, clearing agents, among others.

Business Solutions:

- Port Terminal Operations
- Stevedoring
- Plant Hire Services

Equipment and Facilities @ The Terminal

- Rubber Tyred Gantry (RTG) - 10
- Shore Crane - 7
- Full Handler - 19
- Empty Handlers - 6
- Forklift - 14
- Maffi - 44
- CCTV
- Terminal Operating System
- See Through Perimeter Fencing
- High-Mast Lighting System
- Standard warehouse with capacity of 8,200 metric tonnes of cargo

TERMINAL STORAGE CAPACITY:

CONTAINERS

Item	Capacity
Full Containers	14,000 TEUs
Full Export Containers	1,300 TEUs
Empty Export Containers	3,840 TEUs
Reefer Plus	102 units
Examination Area	300 TEUs
Scanning Yard	900 TEUs

GENERAL CARGO

Item	Capacity
Covered Area	3000 m ²
Warehouse	720 m ²
Open Space	600 m ²

SAHCO PLC

Skyway Aviation Handling Company PLC (SAHCO) is an aviation ground handling service provider.

SAHCO, which was formerly known as Skypower Aviation Handling Company Limited before it was privatized and handed over to the SIFAX Group on December 23, 2009, was carved out of the defunct Nigeria Airways as part of the Nigerian government's Ministry of Aviation reform of 1996.

The service offering of SAHCO Plc involves all the actions that take place from the time an aircraft touches down on the tarmac to the time it is airborne, including RAMP HANDLING, PASSENGER HANDLING and CARGO/MAIL HANDLING.

- Ship Husbandry
- Ship Chartering
- Import
- Export
- DDU/DDP Services
- Packing & Removal
- Airfreight services (full documentation, customs clearance, tracking and tracing, etc)

Advanced cold chain

SAHCO, THE GATEWAY TO PERISHABLES EXPORT FROM AFRICA TO THE WORLD

Skyway Aviation Handling Company (SAHCO) PLC, has continued to serve as an effective gateway to export of perishables through a well-equipped transit warehouse which provides access for other West African countries to export perishables to EU countries in the optimal temperature.

SAHCO provides effective transit Ground Handling Services to major airlines through the company's ultra-modern transit warehouse, equipped with an effective cold-room that regulates perishables to the right temperature to avoid decay. The transit warehouse is built solely to serve Airlines from West Africa for the purpose of transiting their perishables to Europe through Lagos, Nigeria.

The nature of the goods that we handle are fresh cut fruits (pineapples, grapes, guava) cut and put in plastic bowls, they have a shelf life of 3-4 days. This makes it important that if it gets to Nigeria today, it should be on the shelf for display and sale the next day; within a 24-hour window. The buyer still has between 48hrs to 72hrs before it expires.

The items are packed in boxes with dry ice and when the goods are received, they are screened through X-ray and ETB and are sent into the cooler/cold room, it stays there until the flight is ready and it is conveyed straight into the aircraft. They are to be on the shelves the following morning in their various destinations.

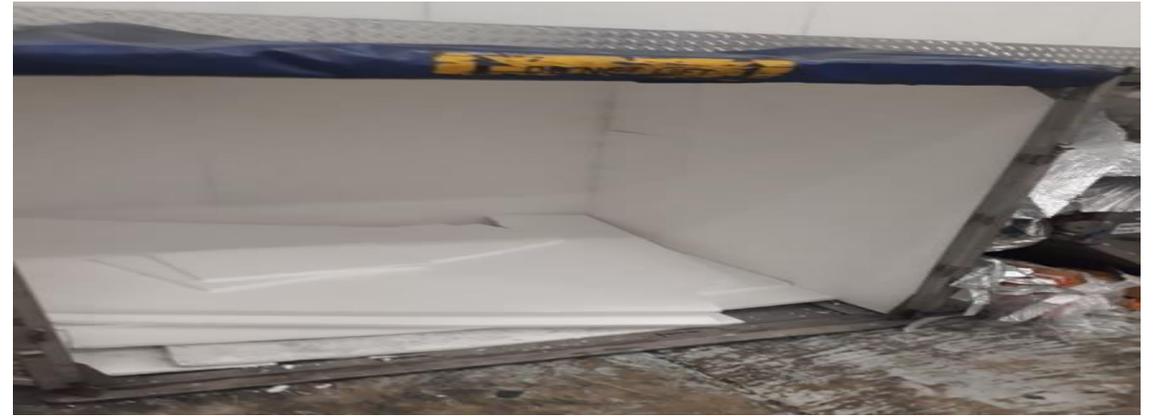

From the farm, to the aircraft from either Ghana, Benin Republic, Cotonou etc., to us and we process and store the perishables until they are ready to be flown to any of their destinations in Europe.

The screening room is also fully air conditioned to avoid a sudden drop in temperature, the goods are also not exposed to any form of hazard. The goods are stored however the airlines wish for them to be stored, either in containers, boxes etc.

Recently, SAHCO has ordered cooler dollies from one of the best Ground Support Equipment Manufacturer, Bombelli in Italy to help transmit perishables from aircraft in the same temperature into the warehouse and maintaining the same temperature while being transmitted into another aircraft to Europe.

The effectiveness of SAHCO's transit operations has attracted big Airlines like Air France/KLM amongst others who SAHCO constantly provides such services for; safely, speedily and effectively without damages.

Certified with RA3 which is a requirement for Ground Handling Companies to be able to ship to Europe, SAHCO is also IATA's Safety Audit for Ground Operations, ISAGO certified. It is safe to say that SAHCO is a major hub to export of perishables in West Africa.

Advanced cold chain

Sifax recently invested in so called clip on generator sets. This clip on can be hooked on a reefer container, and once setup, will control conditions in reefer container. With this we can offer a sustainable temperature controlled chain, from loading at farm till loaded on board of vessel. Sifax drivers will be trained to control settings during trip.

One of 100 Sifax owned trucks will load reefer from an off dock, and will drive to loading point. Required setting will be done before loading, and doors closed after loading. Depending situation on the road and booking made with which shipping line, truck will drive direct to terminal, or will drive to one of our owned off docks, and reefer will be off loaded / stored there, till terminal / vessel call for same. We hope this gives a further boost for export of quality products out of Nigeria

Export Procedures in Nigeria

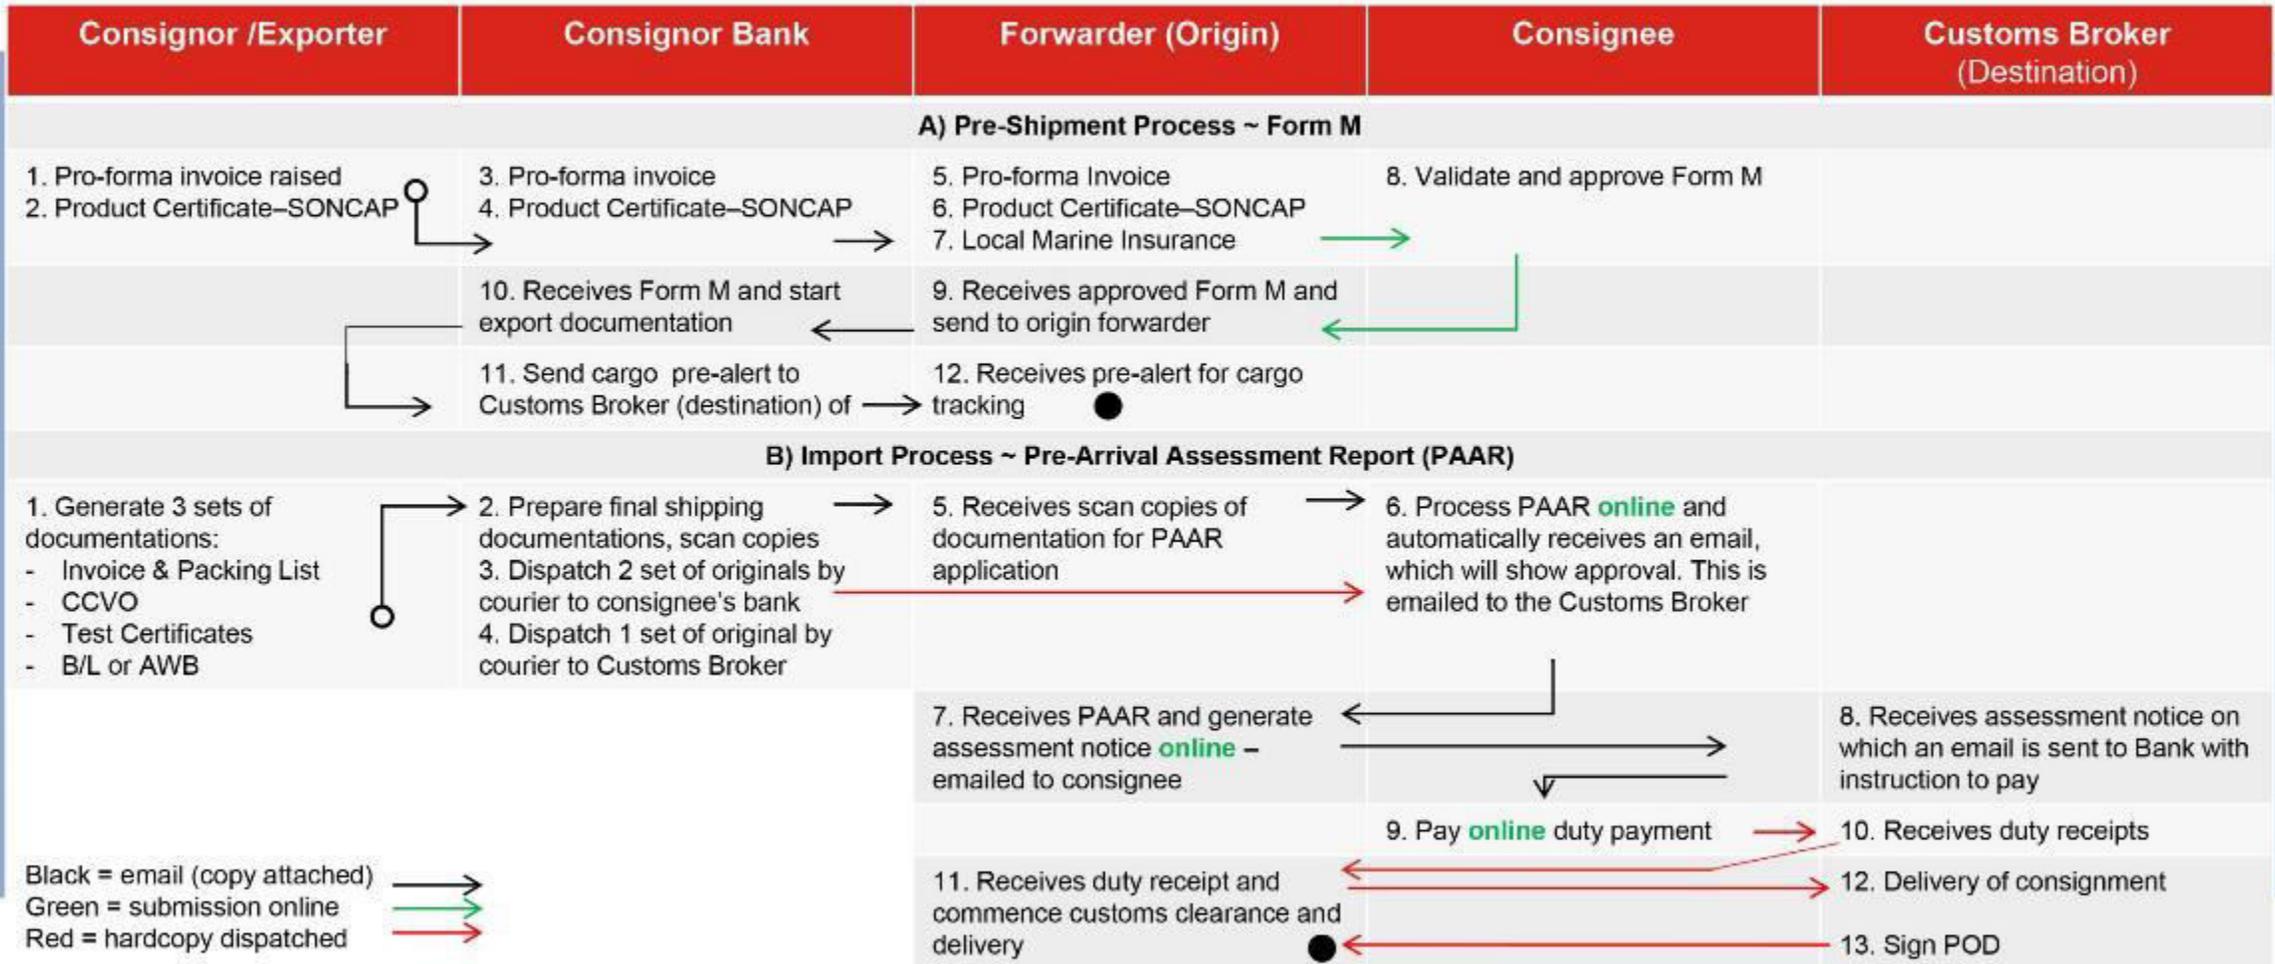

Bank completing the NXP

Nigeria: petroleum and petroleum products 95%, cocoa, rubber

Import Procedures in Nigeria

Parties involved to complete Form M and PAAR
